

CHP Senior Services

CHP Senior Services offers our most vulnerable residents—those ages 55 and older—the ability to age in place in healthy and stable homes. We also provide services focused on the specific health concerns of an aging population. We have three overlapping categories of Senior Services:

Housing Stability

Community Engagement

Health & Wellness

The U.S. population is aging. The nation's population of people 65-and-older is predicted to grow by 39% by 2040, and the number of individuals aged 85-and-older will grow by 56%. This increase is driven by the aging of Baby Boomers, lower birth rates, and increased life spans.

According to the Center for Healthy Aging for Professionals, 80% of older adults have at least one chronic condition, and nearly 70% of Medicare beneficiaries have two or more. They also report that one in four older adults experiences behavioral health problems such as depression, anxiety, or substance abuse.

An aging population with increased health challenges is a trend we need to confront with intention and care to positively impact the lives of the seniors we serve.

We are looking for partners to help bring these services to our senior residents.
